EVELT WEB SOLUTIONS | React Native Mobile Software Engineer   April 2023 - Present
Front-end React Native Engineer that maintained legacy code for a big pharmaceutical company and a delivery service mobile app that are widely used everyday by professionals.
- Refactored the client's legacy code from old React Native class components to more modern Functional components.
- Redesigned old user interface(UI) to a more enterprise level styling from bare bones styling.
- Debugged and created new features and components to meet the client's needs daily.
- Started a new company mobile App from scratch and got it approved for Android Play Store and Apple App Store for Pharmacies and Doctors use to communicate with each other.

MOODY | DEMO VIDEO | Full-Stack Software Engineer   March 2022 - April 2023
A mobile chat app that bridges the gap between plain text messages and the emotion behind messages by labeling/ color coding each message bubble.
- Learned a full-stack (React Native / Firebase) and created a fully functioning mobile chat application within 2 weeks.
- Utilized React Native to create this mobile application to be responsive for any mobile OS.
- Used FireBase "Snapshot" feature to create real time instant rendering of new messages for the back end.
- Used Async Storage to keep users logged in when they close the app without logging out.

(ME)FLIX | FIREBASE DEPLOY | DEMO VIDEO | Full-Stack Software Engineer   June 2022
A static homepage that renders data with my recreation of Netflix's UI design.
- Utilized TMDB, an online API for movies to fetch the website's data.
- Used React Flex boxes to render data fetched from the API in a row slider similar to NETFLIX.
- Deployed web application with Firebase hosting.

A(ME)ZON | FIREBASE DEPLOY | DEMO VIDEO | Full-Stack Software Engineer   April 2022 - May 2022
A fully functioning 'Amazon.com' e-commerce website clone made with "Stripe" e-commerce for backend.
- Implemented Stripe for a safe and full back end e-commerce payment feature.
- Utilized Firebase Database to store user profile data and deployed it using Firebase Hosting.
- Styled the CSS front-end from scratch to photo identical Amazon.com UI and UX.
- Used React Context Api to keep track of products in the user's cart before check out.
